

## ICAR-Central Institute for Research on Cattle, Meerut

23.03.2024

In a groundbreaking development in the realm of livestock research and technology, scientists from the ICAR-Central Institute for Research on Cattle (CIRC) recently convened with representatives from D1 Tech Global Corporation Inc., headquartered in Vancouver, Canada. The pivotal discussion centered on the establishment of a cutting-edge cattle institute poised to integrate precision livestock rearing and advanced animal-rearing technologies.

The meeting was chaired by Dr. AK Mohanty, Director, ICAR-CIRC. D1 Tech Global Corporation was represented by Mr. David Kim, Chief Operation and Strategy Officer, and industry veteran Minh Kha, along with Mrs. Nidhi Sharma, Executive Director of India operations, and Mr. Kailash, Managing Director of India Operations. Mr. Todd Tueller, Founder & CEO, The Tavaci Technologies, and Mrs. Tiffany Tueller, Head of CSR introduced about their unique and sustainable solution for animal feed production, heralding a new era in agricultural efficiency and sustainability.

Dr. Mohanty expressed his gratitude to all the representatives and scientists for their insightful discussion and reaffirmed the institute's commitment to advancing cattle research and promoting sustainable agriculture practices.
