About the speaker

Dr. K. Krishnamurthi has initiated environmental health research at CSIR-NEERI for early health risk assessment and biomarker identification. Epidemiology and biomonitoring approaches have been established to undertake the health risk assessment of the population. He is working with the government, judiciaries, and industries for health impact assessment whenever there is an emergency/exposure.

Dr. K. Krishnamurthi has about 29 years of research experience with involvement in over 35 research and consultancy projects in various capacities i.e. principal investigator and co-investigator. He has organized about 12 National and International conferences/symposia in the capacities of convener, co-organizing secretary and organizing secretary. He is an Editorial Board member for about 6 International Journals, reviewer for about 15 National and International journals. He has published more than 95 publications in various National and International journals, presented papers in about 120 National and International conferences, he has three international patents to his credit. He also served as an expert committee member to review ICMR, New Delhi sponsored research project on the Centre of advanced research on air pollution and health effects at Sri Ramachandra Institute of Higher Education and Research (SRU), Chennai. He was also a committee member on climate change and health at Ministry of Health and Family Welfare, New Delhi. He served as member of Board of Studies in Biotechnology & Biochemistry at RTMNU, Nagpur, he is committee member for Project Advisory and Monitoring Committee (PAMC) of Earth and Environmental Sciences, New Delhi since 2016 till date. He is also a member of Research Advisory Board of ICMR-Institute namely National Institute for Research on Environmental Health (ICMR-NIREH), Bhopal.

Dr. K. Krishnamurthi plans to continue his engagement in occupational and environmental health and climate change mitigation research that are likely to bring changes in policy decisions with impact in reducing health burden of India.
